com By 2011, that number had dropped to 37 percent In 2016, the number had fallen to 27 percent.. S were available with both automatic and manual transmissions, according to a study by Edmunds.. S The trend line is clear In 2006, 47 percent of new car models offered in the U.

Next year, I will be living in Europe for about an year or two and since most cars over there are sticks, so I'd like to re-learn how to drive one.. May 18, 2009 National Emerald Club - Manual transmission rentals? - I usually rent Alamo (or National) due to their great service.. Like driving a car with a stick shift and a clutch pedal? They're disappearing features in North America, where less than three percent of new car models sold in the United States now have a manual transmission.

But outside of North America, it's a whole different story Stick Shifts Are an Endangered Species in the U.
